Tessan Surge Protector Power Strip Tower with 8 Outlets 4 USB

Being bored with the messy cords and looking for a power strip with multiple outlets?

Tessan Power Strip Tower has truly widely-spaced outlets that enable you to use multiple outlets simultaneously.

This well-designed tower provides 4 orientations of outlets for greater flexibility, giving you a brand new charging experience in daily life.

Wide Spaced Outlets

The closest distance to each plug is 38 mm. In order for you to use the 8 outlets at the same time, the tower provides enough space for each plug to avoid overcrowding.

Power Strip with Long Cord

The tower power strip 8 outlets 4 USB with extra long extension cord solves the problem of your desk being far from the socket. You can use your device almost anywhere in the room thanks to our 10 feet cord.

Circuit Breaker

This product is built-in red reset button. When overloaded, this red button will be activated automatically to cut off the current and protect the circuit. When the temperature drops to normal, you can reactivate the red button to continue using the power strip.

Individual Switches

We designed two switches to control the front and back outlets (4 outlets each). When you don't need to use so many outlets, you can turn it off, which can save energy.

Space Saving Power Strip

Vertical design strip provides enough space for each outlet and usb port, saving much space and organize various cords at home or working area.

Surge Protector Power Strip

This is also a tower surge protector. This is a very important feature to protect your expensive electronic appliances. It avoids minor surges and ensures the normal use of your appliances.
